Embossing with Extra Pzazz

Shadows, highlights and a third dimension

Workshop on 15th June 2019

9.45am to 4.00 pm

Rockwell Green Village Hall, Rockwell Green, Wellington TA21 9BU

Embossing is the art of shaping letters and patterns so that they are raised above the surface of the surrounding paper. Embossed surfaces cast subtle shadows, giving an appearance of quality wherever used. You will learn to prepare and cut templates which can be re-used, along with the embossing process, with its many and varied applications.

With a little more cutting for 3D 'build-ups' and some exciting multiple embossing, perhaps even a touch of colour, you can really give it that extra pzazz!

Come and enjoy these two, easily acquired, related techniques, to produce some stunning results... Suitable for all levels.
