MOUSE ROMAN with Josie Brown

It's fun, it's lively and it's contemporary! This workshop is an introduction to a script which is easy to learn for beginners and a light-hearted contrast to other hands for those with some experience. It can be carried out simply in monoline form, or penmanship skills can be developed using press & release techniques. This script is particularly useful for informal and spontaneous work like greetings cards, journals or little books and anyone can play with the letterforms, enjoying their happy-go-lucky stance on the page. There may be a little 'foldy' thing to write on too.
